

Key Investor Information

This document provides you with key investor information about this sub-fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this sub-fund. You are advised to read it so you can make an informed decision about whether to invest.

SANTANDER GO SHORT DURATION
DOLLAR
a sub-fund of SANTANDER SICAV

Class
I

ISIN
LU2014472919

The management company is
Santander Asset Management
Luxembourg S.A.

Objectives and Investment Policy

Objective: The Sub-Fund seeks to achieve a return in excess of US money markets by investing primarily in USD-denominated short-term debt securities.

Investment policy: The Sub-Fund may invest in government bonds (US Treasury securities, securities issued or guaranteed by the US government or its agencies), corporate debt securities and cash.

The weighted average duration of the portfolio will not exceed one year, and the initial or remaining maturity of each debt security will not exceed three years from the date of settlement.

The investments in this Sub-Fund will have at least an investment grade rating by major rating agencies or market benchmarks. All long term securities will be rated at least A- or A3 (or the equivalent) at the time of purchase and all short term securities will be rated at least A-2/P-2 (or the equivalent) at the time of purchase. For split rated securities, the lowest rating shall prevail.

For efficient portfolio management and for hedging purposes, the Sub-Fund may also invest in financial derivative instruments, such as interest rate futures, government bond futures and currency forwards, within the limits stated in its prospectus.

The Sub-Fund may invest up to 10% of its assets in UCITS and other UCIs on an ancillary basis.

This Sub-Fund does not qualify as a money market fund within the meaning of the Money Market Fund Regulation and should not be treated as a substitute for a money market fund.

The Sub-Fund is actively managed in reference to the ICE BofA 0-3 Month US Treasury Bill Index (the "Benchmark"). The Sub-Fund does not track the

Benchmark. The reason for referring to the Benchmark in this investment policy is to indicate that it is used for performance comparison purposes. However, the Investment Manager uses its discretion to select holdings based on an analysis of market conditions and an analysis of a company's prospects and valuations. As such, the Investment Manager will not hold all of the Benchmark constituents.

Net asset value calculation frequency: Daily, any full Business day.

Subscription, conversion and redemption applications lodged with the Registrar and Transfer Agent in Luxembourg on any Dealing Day (whereas a "Dealing Day" is any full Business Day preceding a Valuation Day) before 16:00 Luxembourg time (the "cut off time"), will be processed on that Dealing Day, using the net asset value per Share determined on the next Valuation Day for the relevant Class.

This is an accumulation share class in USD.

Recommendation: This Sub-Fund may not be appropriate for investors who envisage withdrawing their money in less than one year.

Risk and Reward Profile

Less reward, less risk High reward, high risk

The number indicated above is the fund's **Synthetic Risk Reward Indicator**, a way of illustrating the risk and reward profile of a fund by using historic performance data. Please be aware, this value can change over time and it may not be a reliable indication of the fund's future risk profile. In addition, the lowest category does not mean a risk-free investment.

A ranking of **2** means this fund typically has a low level of volatility, meaning that the fund's value is unlikely to fluctuate dramatically, but change at a steady pace over time.

Investors should be aware of the following risks:

Derivatives Risk: The fund is permitted to use derivative instruments. The value of derivatives can be volatile and may result in gains or losses in excess of the amount required initially to establish a position.

Market Risk: Investments in the fund are subject to market fluctuations that could cause the value of a particular investment to change in a way that is detrimental to the fund's value.

Interest Rate Risk: A rise in interest rates can generally be expected to depress the value of the fund's fixed income investments.

Credit Risk: It refers to the likelihood of the fund losing money if an issuer is unable to meet its financial obligations, such as the payment of principal and/or interest on an instrument, or goes bankrupt.

Liquidity Risk: There is the possibility that the fund may lose money or be prevented from earning capital gains if it cannot sell a security at the time and price that is most beneficial to the fund and may be unable to raise cash to meet redemption requests.

Counterparty Risk: Funds that invest in Over-The-Counter (OTC) contracts may find themselves exposed to risk arising from the solvency of counterparties to those transactions and from their ability to respect the conditions of the contracts. The fund may enter into futures, options and swap contracts including credit default swaps or use derivative techniques, each of which involves the risk that the counterparty will fail to respect its commitments under the terms of each contract.

Operational Risk: The risk of failures or delays in the system, processes and controls of the fund or those of its service providers that could lead to fund

losses.

Currency Risk: Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations.

Charges

The fees are used to cover the operating costs for the Sub-Fund, including marketing and distribution costs. These fees reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.25%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown above are the maximum that may be charged. In some cases, you might pay less. You can obtain the actual charges directly from your financial adviser or distributor. The entry charges are deducted before your capital is invested.

The ongoing charge percentage indicated is based on the fees from the previous financial period, ended on 31 December 2020. This figure can vary from one financial period to another.

You can obtain more information about these charges, in the «fees and expenses» section of the prospectus.

Past performance

Past performance of Sub-Fund is not necessarily indicative of future performance.

The calculation of the past performance includes all fees and commissions which accrues on fund level.

This class was created in 2019.

The past performance has been calculated in USD.
