

Key Investor Information

This document provides you with key investor information about this sub-fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this sub-fund. You are advised to read it so you can make an informed decision about whether to invest.

SANTANDER SELECT INCOME
a sub-fund of SANTANDER SICAV

Class
AD

ISIN
LU1590077316

The management company is
Santander Asset Management
Luxembourg S.A.

Objectives and Investment Policy

Objective: The objective of this Sub-Fund is to provide a consistent level of income and capital growth over a full market cycle from a portfolio invested, in a diversified range of fixed interest instruments and equities, directly or indirectly, through UCITS or eligible UCIs.

Investment policy: The Sub-Fund's exposure to equities will not exceed 70% of its net assets.

This Sub-Fund may invest up to 100% of its net assets in eligible fixed interest instruments. The exposure to fixed income securities will be achieved through government bonds and corporate bonds including investment grade and high yield bonds or any other fixed income security or instrument the Investment Manager deems suitable for the Sub-Fund such as, but not limited to, money market instruments, convertible bonds and inflation-linked fixed income securities.

The Sub-Fund may invest up to 25% of its net assets in securities rated lower than Baa3/BBB- by major credit rating agencies at the time of the purchase. The Sub-Fund will not invest in unrated securities nor in distressed securities.

The Sub-Fund may invest up to 15% of its assets in Alternative Investments. Alternative investments are considered investment funds or asset classes that are not classified under traditional asset classes, for example absolute return funds (always UCITS), investment funds allowing indirect exposure to basic materials (ETF/funds) and other commodities, investment funds allowing indirect exposure to real estate (ETF/funds), and similar eligible instruments.

The Sub-Fund may invest up to 10% of its net assets in exchange-traded commodities (ETCs), in eligible financial derivative instruments on commodities indices or on indices based on financial derivatives on commodities qualifying as eligible financial indices.

The total exposure to emerging markets will not exceed 25% of the Sub-Fund's total net assets.

The Sub-Fund will invest mainly in Euro denominated assets, notwithstanding that a maximum of 30% of total net assets may be invested in assets denominated in other OECD country currencies.

The Sub-Fund may also invest in financial derivative instruments including swaps, forwards, futures, options and total return swaps, within the limits stated under the headline "Techniques and Instruments" for efficient portfolio management, to gain long or short exposure to assets and markets, as well as for hedging purposes.

In case the Sub-Fund uses total return swaps, the underlying of these total return swaps will consist of instruments in which the Sub-Fund may invest according to its investment policy. In particular, total return swaps may be used to gain exposure to equity or fixed income related securities, to absolute return strategies for efficient portfolio management and, but not limited to, hedging

part of or the whole portfolio of the Sub-Fund. The expected proportion of the assets of the Sub-Fund that can be subject to total return swaps is 40% and the maximum proportion of the assets of the Sub-Fund that could be subject to them is 100%.

The Sub-Fund is actively managed and it is not managed in reference to a benchmark.

Net asset value calculation frequency: Daily, any full Business day.

A prior notice of one Dealing Day will be required for subscription, conversion and redemption applications lodged with the Registrar and Transfer Agent in Luxembourg before 16:00 Luxembourg time (the "cut off time") so that any application received before the cut off time of any Dealing Day D will be processed at the Net Asset Value applicable on Dealing Day D+1.

This is a EUR distribution share class. Unless specifically decided by the Board of Directors, the dividends will be paid to shareholders.

Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Risk and Reward Profile

Less reward, less risk

High reward, high risk

The number indicated above is the fund's **Synthetic Risk Reward Indicator**, a way of illustrating the risk and reward profile of a fund by using historic performance data. Please be aware, this value can change over time and it may not be a reliable indication of the fund's future risk profile. In addition, the lowest category does not mean a risk-free investment.

A ranking of 4 means this fund typically has a medium level of volatility, meaning there is a degree of uncertainty over the size of changes in the fund's value over time. This could result in the value of the fund changing over a short period of time in either direction.

Investors should be aware of the following risks:

Derivatives Risk: The fund is permitted to use derivative instruments. The value of derivatives can be volatile and may result in gains or losses in excess of the amount required initially to establish a position.

Market Risk: Investments in the fund are subject to market fluctuations that could cause the value of a particular investment to change in a way that is detrimental to the fund's value.

Interest Rate Risk: A rise in interest rates can generally be expected to depress the value of the fund's fixed income investments.

Emerging Markets Risk: The fund is permitted to hold some exposure to Emerging Markets, which can at times carry a higher degree of risk compared to similar securities in more developed markets due to political and economic events.

Credit Risk: It refers to the likelihood of the fund losing money if an issuer is unable to meet its financial obligations, such as the payment of principal and/or interest on an instrument, or goes bankrupt.

Liquidity Risk: There is the possibility that the fund may lose money or be prevented from earning capital gains if it cannot sell a security at the time and price that is most beneficial to the fund and may be unable to raise cash to meet redemption requests.

Operational Risk: The risk of failures or delays in the system, processes and controls of the fund or those of its service providers that could lead to fund losses.

Currency Risk: Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations.

Charges

The fees are used to cover the operating costs for the Sub-Fund, including marketing and distribution costs. These fees reduce the potential growth of the investment.
