

Key Investor Information

This document provides you with key investor information about this sub-fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this sub-fund. You are advised to read it so you can make an informed decision about whether to invest.

SANTANDER SELECT DYNAMIC
a sub-fund of SANTANDER SICAV

Class
A

ISIN
LU0781564579

The management company is
Santander Asset Management
Luxembourg S.A.

Objectives and Investment Policy

Objective: The objective of this Sub-Fund is to provide with a non-guaranteed maximum volatility level of 20% an attractive level of return from a portfolio invested, directly or indirectly through UCITS or UCIs, in a diversified range of fixed interest instruments and equities, listed or traded worldwide.

Investment policy: The Sub-Fund will invest directly, or indirectly through third party investment funds, in fixed income securities like Government Bonds and corporate bonds including Investment Grade and High Yield, and equities of OECD public or private issuers quoted or traded on OECD official stock exchanges or regulated markets while seeking to control economic and monetary risks, but not excluding investments in emerging countries.

The Sub-Fund's equity exposure may vary from 50% to 100% depending on market conditions and the investment manager markets view.

The Sub-Fund will continuously invest at least 25% of its net assets directly or indirectly via funds in equity assets, excluding depository receipts and financial derivative instruments. In the case of indirect investments, the Sub-Fund will take into account the effective equity ratio of the underlying fund.

Furthermore, in case of adverse equities market conditions this Sub-Fund might temporarily be invested up to 75% of its net assets in cash and money market instruments.

Fixed Income instruments will be focused on a diversified portfolio of international corporate fixed income securities and the sub-fund may invest up to 50% of its net assets in securities whose ratings are lower than Baa3/BBB- or even without credit rating. In the cases where these instruments are not rated, the issuer rating will be used.

Participation in emerging markets (OECD or non-OECD) will be limited to 50% of the Sub-Fund's net assets.

The Sub-Fund may invest up to 20% of its assets in exchange-traded commodities (ETCs), in eligible financial derivative instruments on commodities indices or on indices based on financial derivatives on commodities qualifying as eligible financial indices.

The Sub-Fund may invest up to 20% of its net assets in alternative investments. Alternative investments are considered investment funds or asset classes that are not classified under traditional asset classes, for example absolute return funds (always UCITS), investment funds allowing indirect exposure to basic

materials (always UCITS), convertible bonds, investment funds allowing indirect exposure to real estate (always UCITS), and similar eligible assets.

The Sub-Fund may have a maximum currency risk of 100% of its total net assets.

The Sub-Fund is actively managed in reference to the Euribor 1 month (10%), ML 1-10 years Euro Broad Market (15%) and MSCI AC World (75%) (the "Benchmark"). The Sub-Fund does not track the Benchmark. The reason for referring to the Benchmark in this investment policy is to indicate that it is used for performance comparison purposes. However, the Investment Manager uses its discretion to allocate to different assets based on an analysis of the market conditions, economy prospects valuations and the non-guaranteed maximum volatility level of 20% (annualized volatility with weekly observations for a period of 5 years). As such, the Investment Manager will deviate from the Benchmark asset allocation and invest in other allowed assets that might not be part of it.

Net asset value calculation frequency: Daily, any full Business day.

Subscription, conversion and redemption applications lodged with the Registrar and Transfer Agent in Luxembourg on any Dealing Day (whereas a "Dealing Day" is any full Business Day preceding a Valuation Day) before 16:00 Luxembourg time (the "cut off time"), will be processed on that Dealing Day, using the net asset value per Share determined on the next Valuation Day for the relevant Class.

This is an accumulation share class in EUR.

Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Risk and Reward Profile

The number indicated above is the fund's **Synthetic Risk Reward Indicator**, a way of illustrating the risk and reward profile of a fund by using historic performance data. Please be aware, this value can change over time and it may not be a reliable indication of the fund's future risk profile. In addition, the lowest category does not mean a risk-free investment.

A ranking of 5 means this fund typically has a medium to high level of volatility, meaning there is a degree of uncertainty over the size of changes in the fund's value over time. This could result in the value of the fund changing dramatically over a short period of time in either direction.

Investors should be aware of the following risks:

Derivatives Risk: The fund is permitted to use derivative instruments. The value of derivatives can be volatile and may result in gains or losses in excess of the amount required initially to establish a position.

Market Risk: Investments in the fund are subject to market fluctuations that could cause the value of a particular investment to change in a way that is detrimental to the fund's value.

Interest Rate Risk: A rise in interest rates can generally be expected to depress the value of the fund's fixed income investments.

Emerging Markets Risk: The fund is permitted to hold some exposure to Emerging Markets, which can at times carry a higher degree of risk compared to similar securities in more developed markets due to political and economic events.

Credit Risk: It refers to the likelihood of the fund losing money if an issuer is

unable to meet its financial obligations, such as the payment of principal and/or interest on an instrument, or goes bankrupt.

Liquidity Risk: There is the possibility that the fund may lose money or be prevented from earning capital gains if it cannot sell a security at the time and price that is most beneficial to the fund and may be unable to raise cash to meet redemption requests.

Operational Risk: The risk of failures or delays in the system, processes and controls of the fund or those of its service providers that could lead to fund losses.

Sustainability risk: The Sub-Fund's investments may be subject to sustainability risks. Sustainability risks are environmental, social or governance events or conditions that, if they occur, could cause an actual or a potential material negative impact on the value of the Sub-Fund's investments.

Currency Risk: Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations.

Charges

The fees are used to cover the operating costs for the Sub-Fund, including marketing and distribution costs. These fees reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	2.17%
-----------------	-------

Charges taken from the fund under certain specific conditions

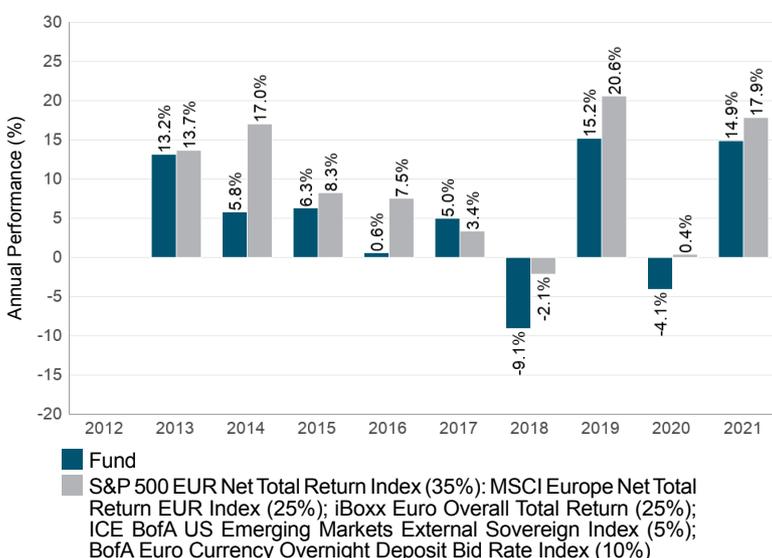

Performance fee	None
-----------------	------

The entry and exit charges shown above are the maximum that may be charged. In some cases, you might pay less. You can obtain the actual charges directly from your financial adviser or distributor. The entry charges are deducted before your capital is invested.

The ongoing charge percentage indicated is based on the fees from the previous financial period, ended on 31 December 2021. This figure can vary from one financial period to another.

You can obtain more information about these charges, in the «fees and expenses» section of the prospectus.

Past performance

Past performance of Sub-Fund is not necessarily indicative of future performance.

The calculation of the past performance includes all fees and commissions which accrue on fund level.

This class was created in 2012.

The past performance has been calculated in EUR.

Benchmark was changed in 2021.

The past performance shown in the chart was achieved under circumstances that no longer apply.
